**Purpose:** To provide a comprehensive understanding and model for using **STEAM** Education with children birth to age five and to promote the long-term success of Pre-K and Kindergarten children.

In early childhood, **STEAM** is an approach to learning that uses several disciplines as access points for guiding children’s inquiry, dialogue, and critical thinking. STEAM provides early exposure to these subjects and helps build a strong foundation for future learning.

*The 11th Annual School Readiness Summit (2023) will focus on “STEAM in Early Childhood Education.” Early Childhood teams will work together collaboratively to learn STEAM content and hands-on activities that they can take back to their community and classroom.*

Each School Readiness Team is invited to participate in the Annual School Readiness Summit on **November 3, 2023**. Please bring your results-oriented team members (11) for a day of excitement and learning! The theme for this event is **“Connecting the Links for Success”** with a focus on collaboration, understanding **STEAM**, and improving all young children’s learning outcomes.
